Friends of Mischa Barton, stars series "Life in the air," I'm worried that the actress back to his party lifestyle effects of its recent treatment.

23-year old star, who in July went to the forced psychiatric observation of the medical center's Cedars-Sinai in Los Angeles, concerned their loved ones appearing in the All Points West festival in New York in just a few days after he writes it from the school.

"It was frightening to see her at a party shortly after the end of treatment. When I learned to play that again, I was shocked. I thought that even if at some time, the pardon such fun" - Ziegenbein said Eric, a family friend of Barton, in an interview for the magazine "Heat". "The fact that immediately after leaving the hospital went to a party, provides that no serious approaches to their problems. It's as if go at all. The time is too proud and independent" - he added.

Barton spent two weeks at the hospital psychiatric ward, where he hit a person posing a threat to life or other. The reason for the hospitalization was suicidal thoughts actress said that her friends alarmed. Barton psychiatric problems likely stem from its dependence on alcohol and drugs.

Star, friend, Suzanne Coppin, argues, however, that Barton does not hear of people who are trying to help.

'Mischa has a support group around them, but apparently it will ignore. I am, that does not listen to the advice of others and does not change their behavior "- said.

This is not the first time that the actress friends concerned about her health take a vote on the matter. At the beginning of August with a friend Barton expressed his concern about the rapid return on plan for the new series "The Beautiful Life."

"She still has problems with each other. This is not the same person as before. I think that comes back to work too soon after leaving the hospital" - said a person close to the star.
